Agenda

- Overview
- Key Security Groups
- Login Process
- Software
- Transfer Server
- Questions?

Overview

- "Tenant" - self contained, highly secure storage and compute environment
- Accessible from Brown compliant network and VPN
- Shared responsibility model
  - Office of Information Technology (OIT) is responsible for technology and Security
  - OIT will NOT access your data
  - PI is responsible for Data Management and ensure users are trained to handle sensitive data
    - PI is responsible for requesting and approving access to the tenant, data security groups & billing
- Encrypted or unencrypted storage available (determined by DUA)

Key Security Groups

- **Admins (PI is only member by default) sh_<tenant>_admins**
  - Exclusive access to data directory
    - Subfolders need to be created and security groups assigned in order for other team members to have access
    - Users will NOT be able to access data until folders are created
- Security Groups Available by Default
  - **Users** – can include all team members
  - **Staff** – can include a subset of team
- Security Groups that Can be Requested
  - Create a custom group for a particular project – can include members of that project
- Member of Admins team will assign above security groups to newly created folders to restrict data access
  - This way PI has complete control over who has access to what data

Key Security Groups

- Other responsibilities of Admins Group
  - Only member is PI (*or approved delegate*)
  - By default, member of all other groups
  - Explicit approval required by PI for group membership
    - We will ask you which specific groups to add users to

Security groups for data transfers - “keys to the kingdom”

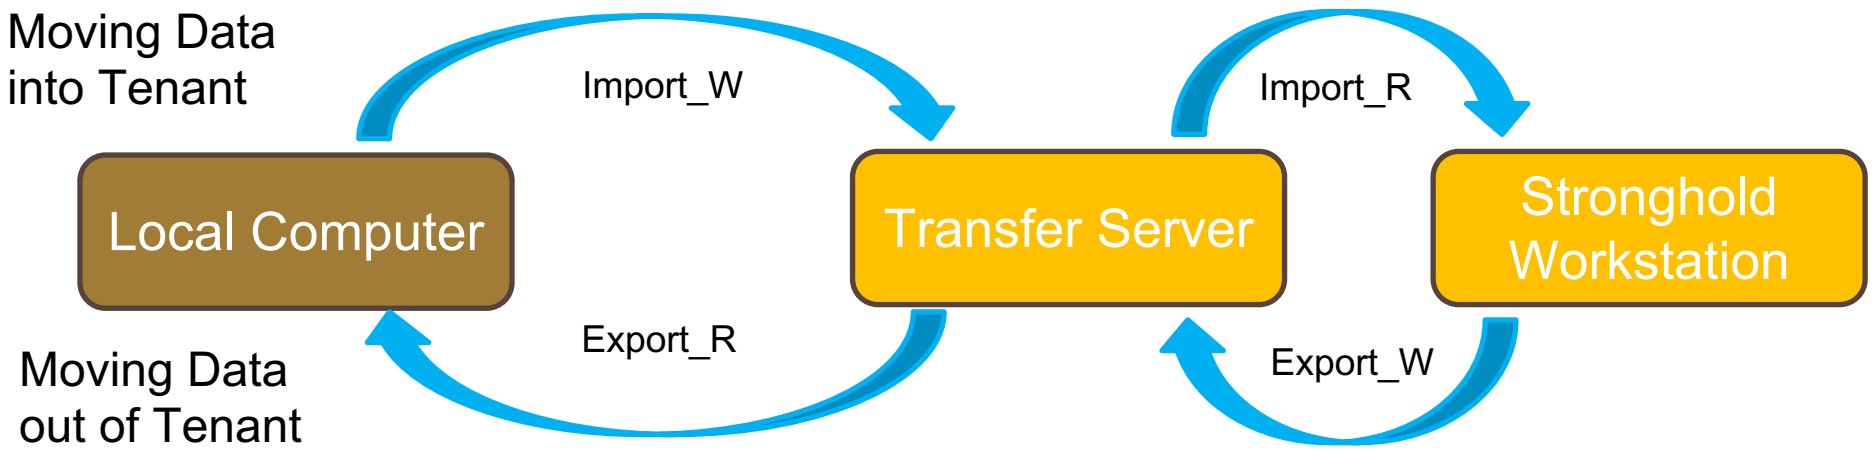

- **Import_W & Import_R** - data *into* Stronghold
- **Export_W & Export_R** - data *out of* Stronghold

Key Security Groups

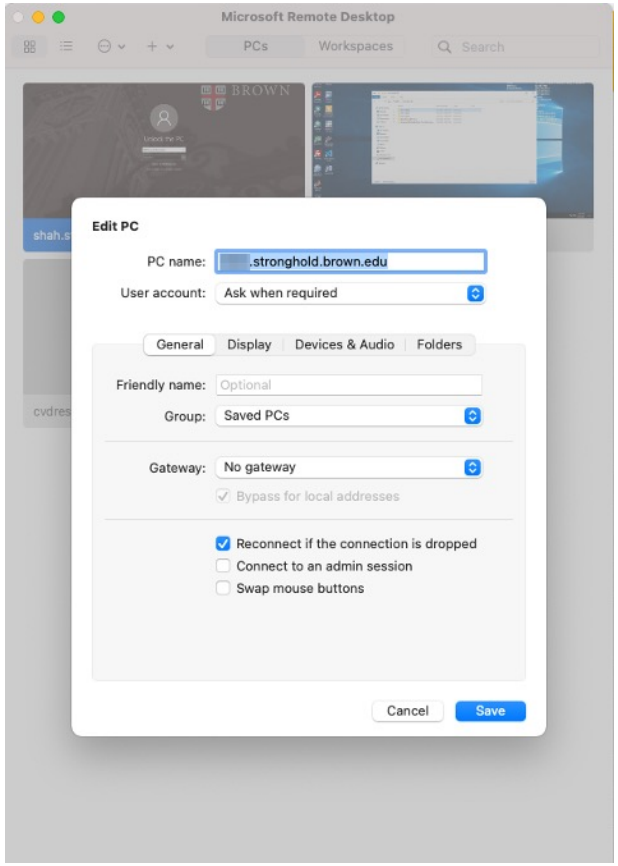

- Other responsibilities of Admins Group
  - Only member is PI (*or approved delegate*)
  - By default, member of all other groups
  - Explicit approval required by PI for group membership
    - We will ask you which specific groups to add users to

Security groups for data transfers - "keys to the kingdom"

- **Import_W & Import_R** - data *into* Stronghold
- **Export_W & Export_R** - data *out of* Stronghold

Login

Microsoft Remote Desktop

- Microsoft Remote Desktop Needed
- `<tenant>.stronghold.brown.edu`
- Windows – Pre-installed
- Mac / Linux – Download from *software.brown.edu*
- https://www.brown.edu/information-technology/software/catalog/microsoft-remote-desktop
- Hostname – <tenant>.stronghold.brown.edu

Software

- Majority of Software stack is pre-installed
  - MATLAB
  - R
  - Office Suite
  - Stata
  - Office Suite
  - VS-Code
  - Arc GIS
- Python (pip) and R (cran) repository
  - Launch Rstudio GUI
  - Matlab GUI

Transfer Server

- Utilized for all data movement in and out of Stronghold
- SFTP, FTPS, HTTPS protocols available for data transfers
- Real time alert sent to <tenant>_admins group for each executed transfer
- Each step of transfer process requires membership in different Active Directory security group, so granular control of who can execute which step

More Support

Folder Creation and Security Assignments

- CCV staff can do this upon request from PI
- CCV staff will document
  - Temporarily adding themselves to Admins group
  - Creating folder and assigning security group
  - Removing themselves from Admins group so they no longer have access to the data

Data Transfers

- CCV staff can assist PI execute data transfers over interactive zoom conference
